1 PAF - Notes

- Since the last PAF release we have undertaken continued work on our source systems. This has included the deletion, addition and modification of postal address points. We have also modified / inserted and deleted several suburbs, streets, towns/cities and their alias data in response to known issues, customer feedback and mis-sorted mail.

Notes on PAF usage

- **Building Names**
Building names are provided to assist in matching addresses only. It is not intended that because a building name appears in the PAF that it should be used as part of the address.
- **The PAF is a snapshot only**
We regularly get enquiries from the public asking why their address cannot be validated by their bank, telco, or other organisation. They are often informed that New Zealand Post address data is used so nothing can be done. In 90% of cases we find these are new addresses that are not yet in the PAF.

If the PAF is used to validate addresses upon input, it should be remembered that the PAF is a snapshot of addresses, and there are approx. 10,000 addresses added in between PAF releases. Your organisation or customer must be able to cater for addresses that are supplied by the public as valid but are not yet in the PAF. In most cases the address will appear in the next PAF and is then able to be validated.

- **The PAF contains postal addresses only**
It should be emphasised that the PAF only contains postal addresses, that is, addresses that receive mail delivery. It is not a complete dataset of all New Zealand addresses and should not be used to validate physical addresses.
e.g. 60 Jubilee Drive, Pauanui is a valid physical address. However, there is no street mail delivery to Pauanui, so the address will not be in the PAF. The customer is likely to receive mail via a PO Box at the PostCentre. This would then be their postal address.

If postal addresses only are not enough for your requirements and you wish to obtain a data file that contains all New Zealand addresses, contact your New Zealand Post account manager or call 0800 804 307.

Counter Delivery Postcode Amendments

This 2020 March PAF quarterly release sees multiple amendments to non-urban/rural address points – most notably Counter Delivery records and their assigned postcodes. Previously there were some Counter Delivery records created with postcodes that do not reflect the address type – notably the 3rd digit which denotes a Service Delivery Type address. These were all historical records, but we have now reviewed and amended the postcodes for these counter delivery points to reflect the correct ADDRESS TYPE. To view these amendments please refer to section 7 Postcode Changes of the release notes (page 9 to page 12) or you can refer to the DELIVERY_ADDRESSES.DAT table, filter on COUNTER DELIVERY and select M in the ACTIONS INDICATOR column.
